

## **Motor Carrier Insurance Risk Management Program Certification and Recertification Requirements**

Congratulations on deciding to further your professional development by participating in Truckload Academy's Motor Carrier Insurance Risk Management Program. The Motor Carrier Insurance Risk Management Program is the preparatory option for taking the Motor Carrier Risk Specialists Certification Exam. To earn the Motor Carrier Risk Specialist (MCRS) designation, you must successfully complete the exam with a score of 80 percent or higher and have at least two years of experience in risk management, insurance purchasing or similar job function.

### **Recertification Requirements**

Once earned, your MCRS designation is good for two years. To maintain your certification, you must complete 20 hours of continuing education (CE) credit before your recertification deadline. Continuing education credits are calculated on a 60-minute hour (one hour of training equals one CE; 75 minutes of training equals 1.25 CE, etc.).

Participation in education and training programs that enhance the insurance risk management personnel's role in a trucking company would qualify for CE credit. Examples would be workshops and general sessions at TCA's Annual Convention, Safety Division Annual Meeting, Refrigerated Division Annual Meeting and Independent Contractors and Open Deck Division Annual Meeting. The education sessions at these events will be identified as those that are applicable for CE credit. TCA's Truckload Academy Webinars On-demand are another source of training for CE credit. Many of these courses are available at no-charge to TCA members.

Education and training offered by other organizations can also count toward recertification. You should send documentation related to any non-TCA educational content to TCA for approval before registering for the event.
